# About Riza

Riza is a collective of leading family businesses, where the passion for growth and bloom is rooted in generations. From January 1, 2025, we will consolidate our range of flowering plants for the market. The result? A flowering assortment of Bromeliads, Orchids, Anthuriums, Spathiphyllum and Azaleas.

Our growers use their craftsmanship every day to produce high-quality plants. They know their products like the back of their hand and always set the bar a little higher. Each in their own way, but with a shared vision and drive. By exchanging knowledge and experiences, they bring out the best in each other. That's what we call 'growing together'.

Growing Together

## Bromelia Specialist

*Bromeliads*

Bromelia Specialist is your trusted partner for a varied range of premium Bromeliads. As a market leader, we specialize in breeding, cultivation and innovative product development. With years of experience, we know which Bromeliads suit each country, retail format, and consumer best. Together with our partners, we deliver top-quality Bromeliads to garden centres, DIY stores, supermarkets, and wholesalers across Europe.

## Karma Plants

*Anthuriums, Jewel Orchids, Philodendrons*

We cultivate high-quality plants under the most sustainable conditions. Our plants are distinguished by our unique and groundbreaking sustainable cultivation system, 'Grown with WaterWick,' ensuring that all our plants are completely peat-free. Driven by the passion of our dedicated team, we strive every day to support our customers, providing thoughtful insights and innovative solutions. As a reliable partner, we guarantee the renowned 'Karma quality' in every plant we offer.

## Maarel Orchids

*Phalaenopsis*

In our nursery in Maasdijk we cultivate 25 varieties of Phalaenopsis (12 cm), each with an average of two branches and sixteen flowers. Our strength lies in this sharp focus. This allows us to produce uniform, large batches of potted orchids with consistent quality that retailers can rely on. We achieve this by working fully automated and sustainably.

## Ter Laak Orchids

*Phalaenopsis*

Growing top-quality orchids in fully sustainable nurseries. That is our driving force. That's why we continuously invest in sustainable solutions, technological innovations and strong collaborations. Just as we do in knowledge, growth and enjoyment within our team. Together, we aim to enhance people's health and happiness with our orchids. Now and in the future.

## Van der Voort / Concorde Plants

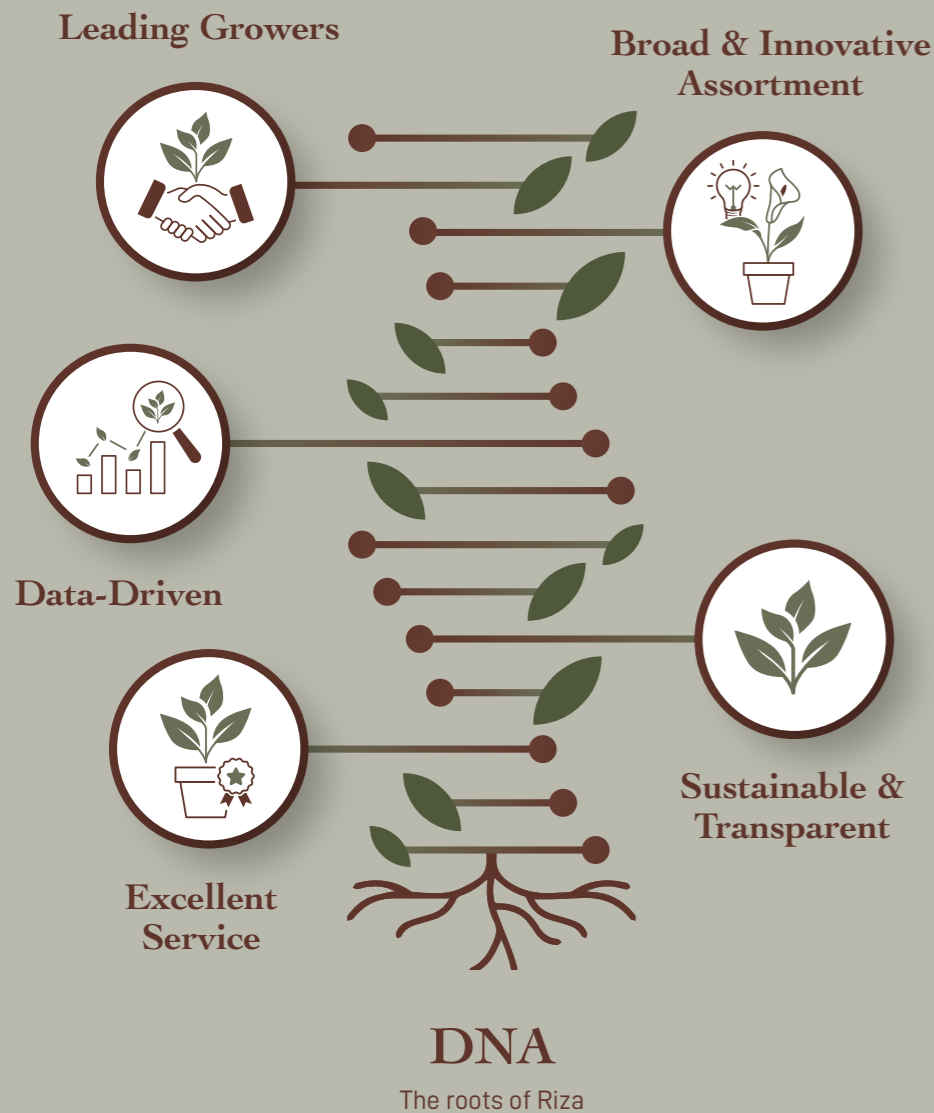

*Spathiphyllum, Azalea*

Welcome to the world of Spathiphyllum and Azalea. In our nurseries in Honselersdijk, we work every day to produce top-quality plants in a wide variety of pot sizes. Our colleagues, advanced automation and the use of data make this possible. Together, we have one goal: to let consumers enjoy our plants for as long as possible!

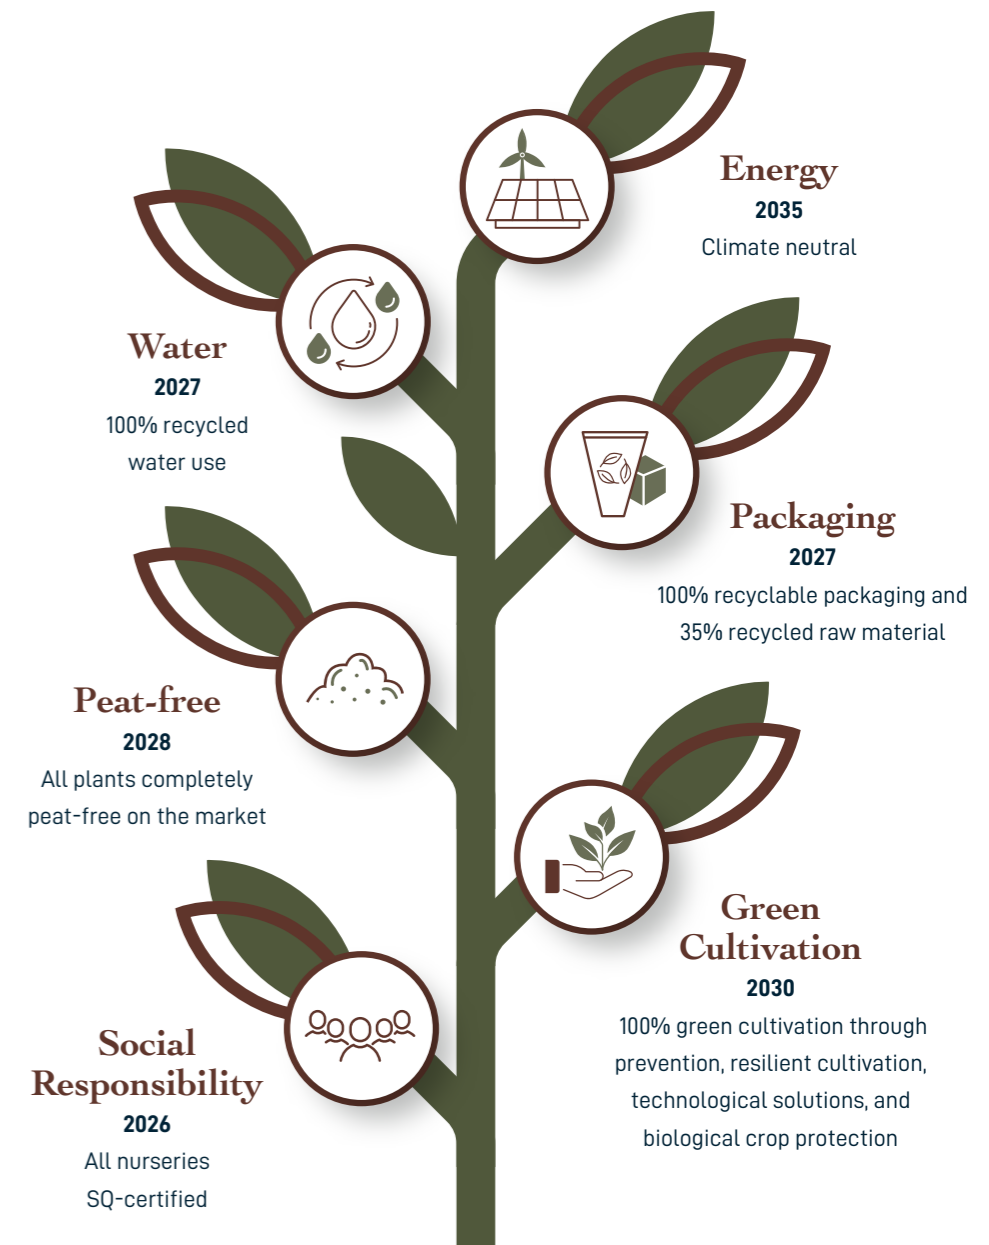

# Growing Together

Making people happy and joyful with the most beautiful flowering plants. That is our goal. Our aim? The right plant, in the right place, at the right time, in the right presentation. We do this based on solid data. That's why we continually invest in knowledge and data about the market, customers, and consumers. Just as we invest in transparency regarding the sustainable cultivation methods of our growers. Together with our growers and customers, we aim not only for maximum value creation in the supply chain and on the shelf but also to bring nature closer to people.

# Sustainability

Sustainable products, sustainable production and sustainable relationships. This is the driving force behind Riza and our growers. Intrinsically motivated, we continuously work on reducing our ecological footprint. What this requires from all of us? Collaboration, innovation and transparency. Throughout the entire chain. So that we can pass on a healthy world to future generations.

## The Riza Tree

Our Commitment to Our Planet

# Grown with WaterWick

PEAT  
FREE

## The sustainable cultivation solution

The Grown with WaterWick cultivation system is a revolutionary approach to sustainable gardening that benefits growers, retailers, and consumers alike. Since 2018, Karma Plants, our Anthurium grower, has dedicated itself to this system, which allows plants to absorb only the water they need, eliminating water waste. Each plant of our Anthurium grower is equipped with a 'Waterwick' string from the start, ensuring the delivery of essential nutrients for healthy root formation and improved plant longevity.

### PEAT-FREE

Additionally, this innovative system supports peat-free cultivation. Karma Plants has conducted extensive trials over three years to find alternatives to traditional peat-based potting soil, successfully reducing peat usage while maintaining high quality. Their commitment has led to a fully peat-free product line, demonstrating that sustainability can coexist with excellent plant quality. Through Grown with Waterwick, Karma Plants is contributing to a healthier planet for future generations.

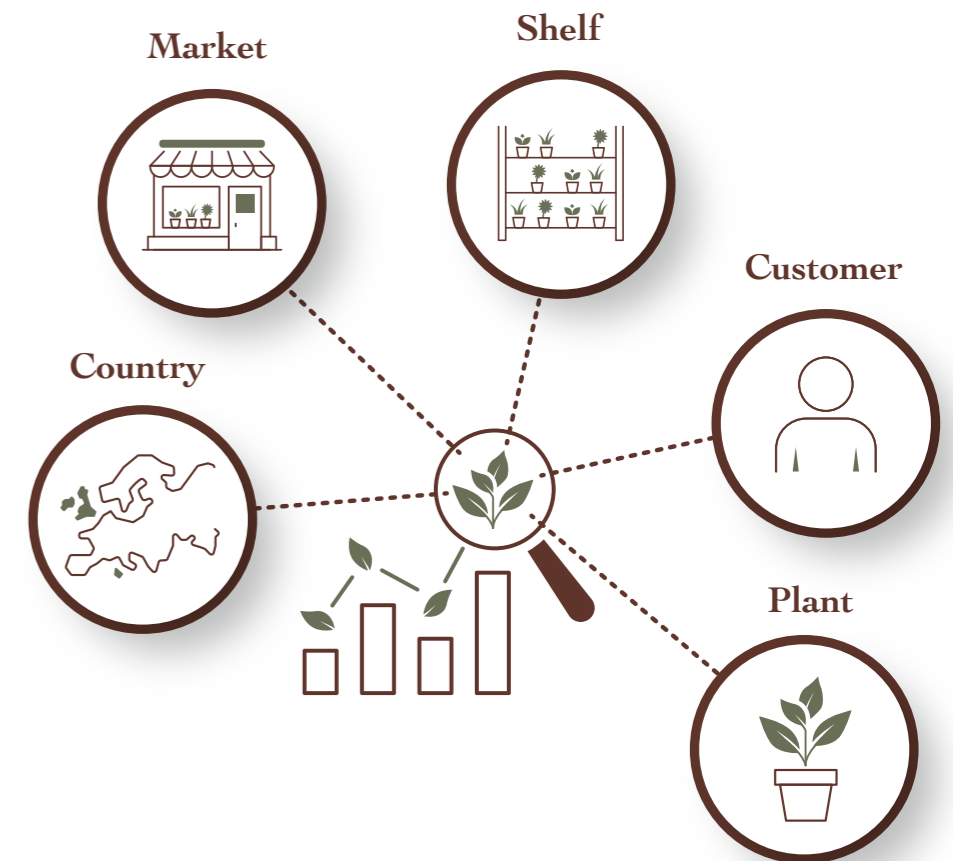

### DECORATIVE POTS ADDING VALUE

How can we offer consumers more convenience in care? How can optimal benefit be obtained from the WaterWick system? These are all questions that our Anthurium grower Karma Plants has tackled. The result? A perfect fit pot with water reservoir for easy care at home.

# Data-driven

At Riza we put you as a customer, your formula and the consumer first. To achieve your goals, the right plants must be on your shelf at the right time. That is why we continuously invest in knowledge and data about the country, the market, the shelf, the customer and our plants. This is possible thanks to our volumes and scale. We translate the relevant data into substantiated and tailor-made advice.

**Riza Data**

We understand data

# Our Brands

## Mazie

We supply our plants under our label Mazie. Mazie comes from Greek and literally means 'together'. After all, plants bring us together at meaningful moments and make us feel one with nature. Consumers can easily access all care tips via a QR code on the packaging. Handy, isn't it?

## Private Label

Do you run your own label to maintain uniformity in your store? No problem! Upon request, we can supply our plants under your label. Feel free to contact us to discuss your wishes.

# Our Plants

## Easy care

Our plants are strong and provide months of blooming pleasure. On one condition: the consumer has to give them enough love and attention. Difficult? Certainly not! You can easily find the care tips for each product via this QR code.

← Scan for care

## Health & happiness

Did you know that plants improve our health? Plants provide oxygen, improve air quality and enhance our well-being. In a green environment, we are more productive and creative. Moreover, plants reduce stress and enhance our ability to concentrate. And not to forget; they make every space more inviting.

# Discover our assortment

## Azalea

The Azalea is a real seasonal classic from our grower Van der Voort Potplanten. This plant is produced from late summer until spring, with a peak around Christmas. In addition to our Originals, the range is completed with Azaleas in unique shapes, such as Faro and Cloud.

Originals

Faro

Cloud

## Anthuriums

Introducing the high-quality Anthuriums from our grower, Karma Plants. A diverse range of anthurium varieties, including the newly introduced botanical Anthurium Clarinervium. Each plant in this collection is equipped with a WaterWick system and is completely peat-free, ensuring sustainable growth and easy care.

## Greens

These green heroes strengthen our total range of flowering plants. These greens can easily be mixed with our Anthuriums, Bromeliads, Orchids and Spathiphyllum.

Philodendron

# Retail Services

## Annual Plan

Year-round optimal shelf performance? We are happy to translate our assortment into a customized annual plan. Together, we will create a well-thought-out plan with plants and colours that perfectly align with the specific country, season, store format and latest trends. **Of course, with special attention to occasions such as Valentine's Day, Easter and Christmas.**

## Inspiring Shelf

Every two years, we present four new lifestyles. Each lifestyle represents an atmosphere that resonates with a specific target audience. Plants, ceramics and colours are carefully selected for each lifestyle to create an inspiring display. Whether it's for a garden center table or a retail display, we are happy to collaborate with you.

**Curious about the current lifestyles and the corresponding assortment? Be inspired by this catalog.**

## Contentportal

Looking for practical or surprising content? For example photos for your magazine, a care poster for your store or videos for your social media channels. Visit our contentportal and download content for free (available in six languages).

### Special requests?

Our marketing department is ready to assist you.

## Shopper Activation

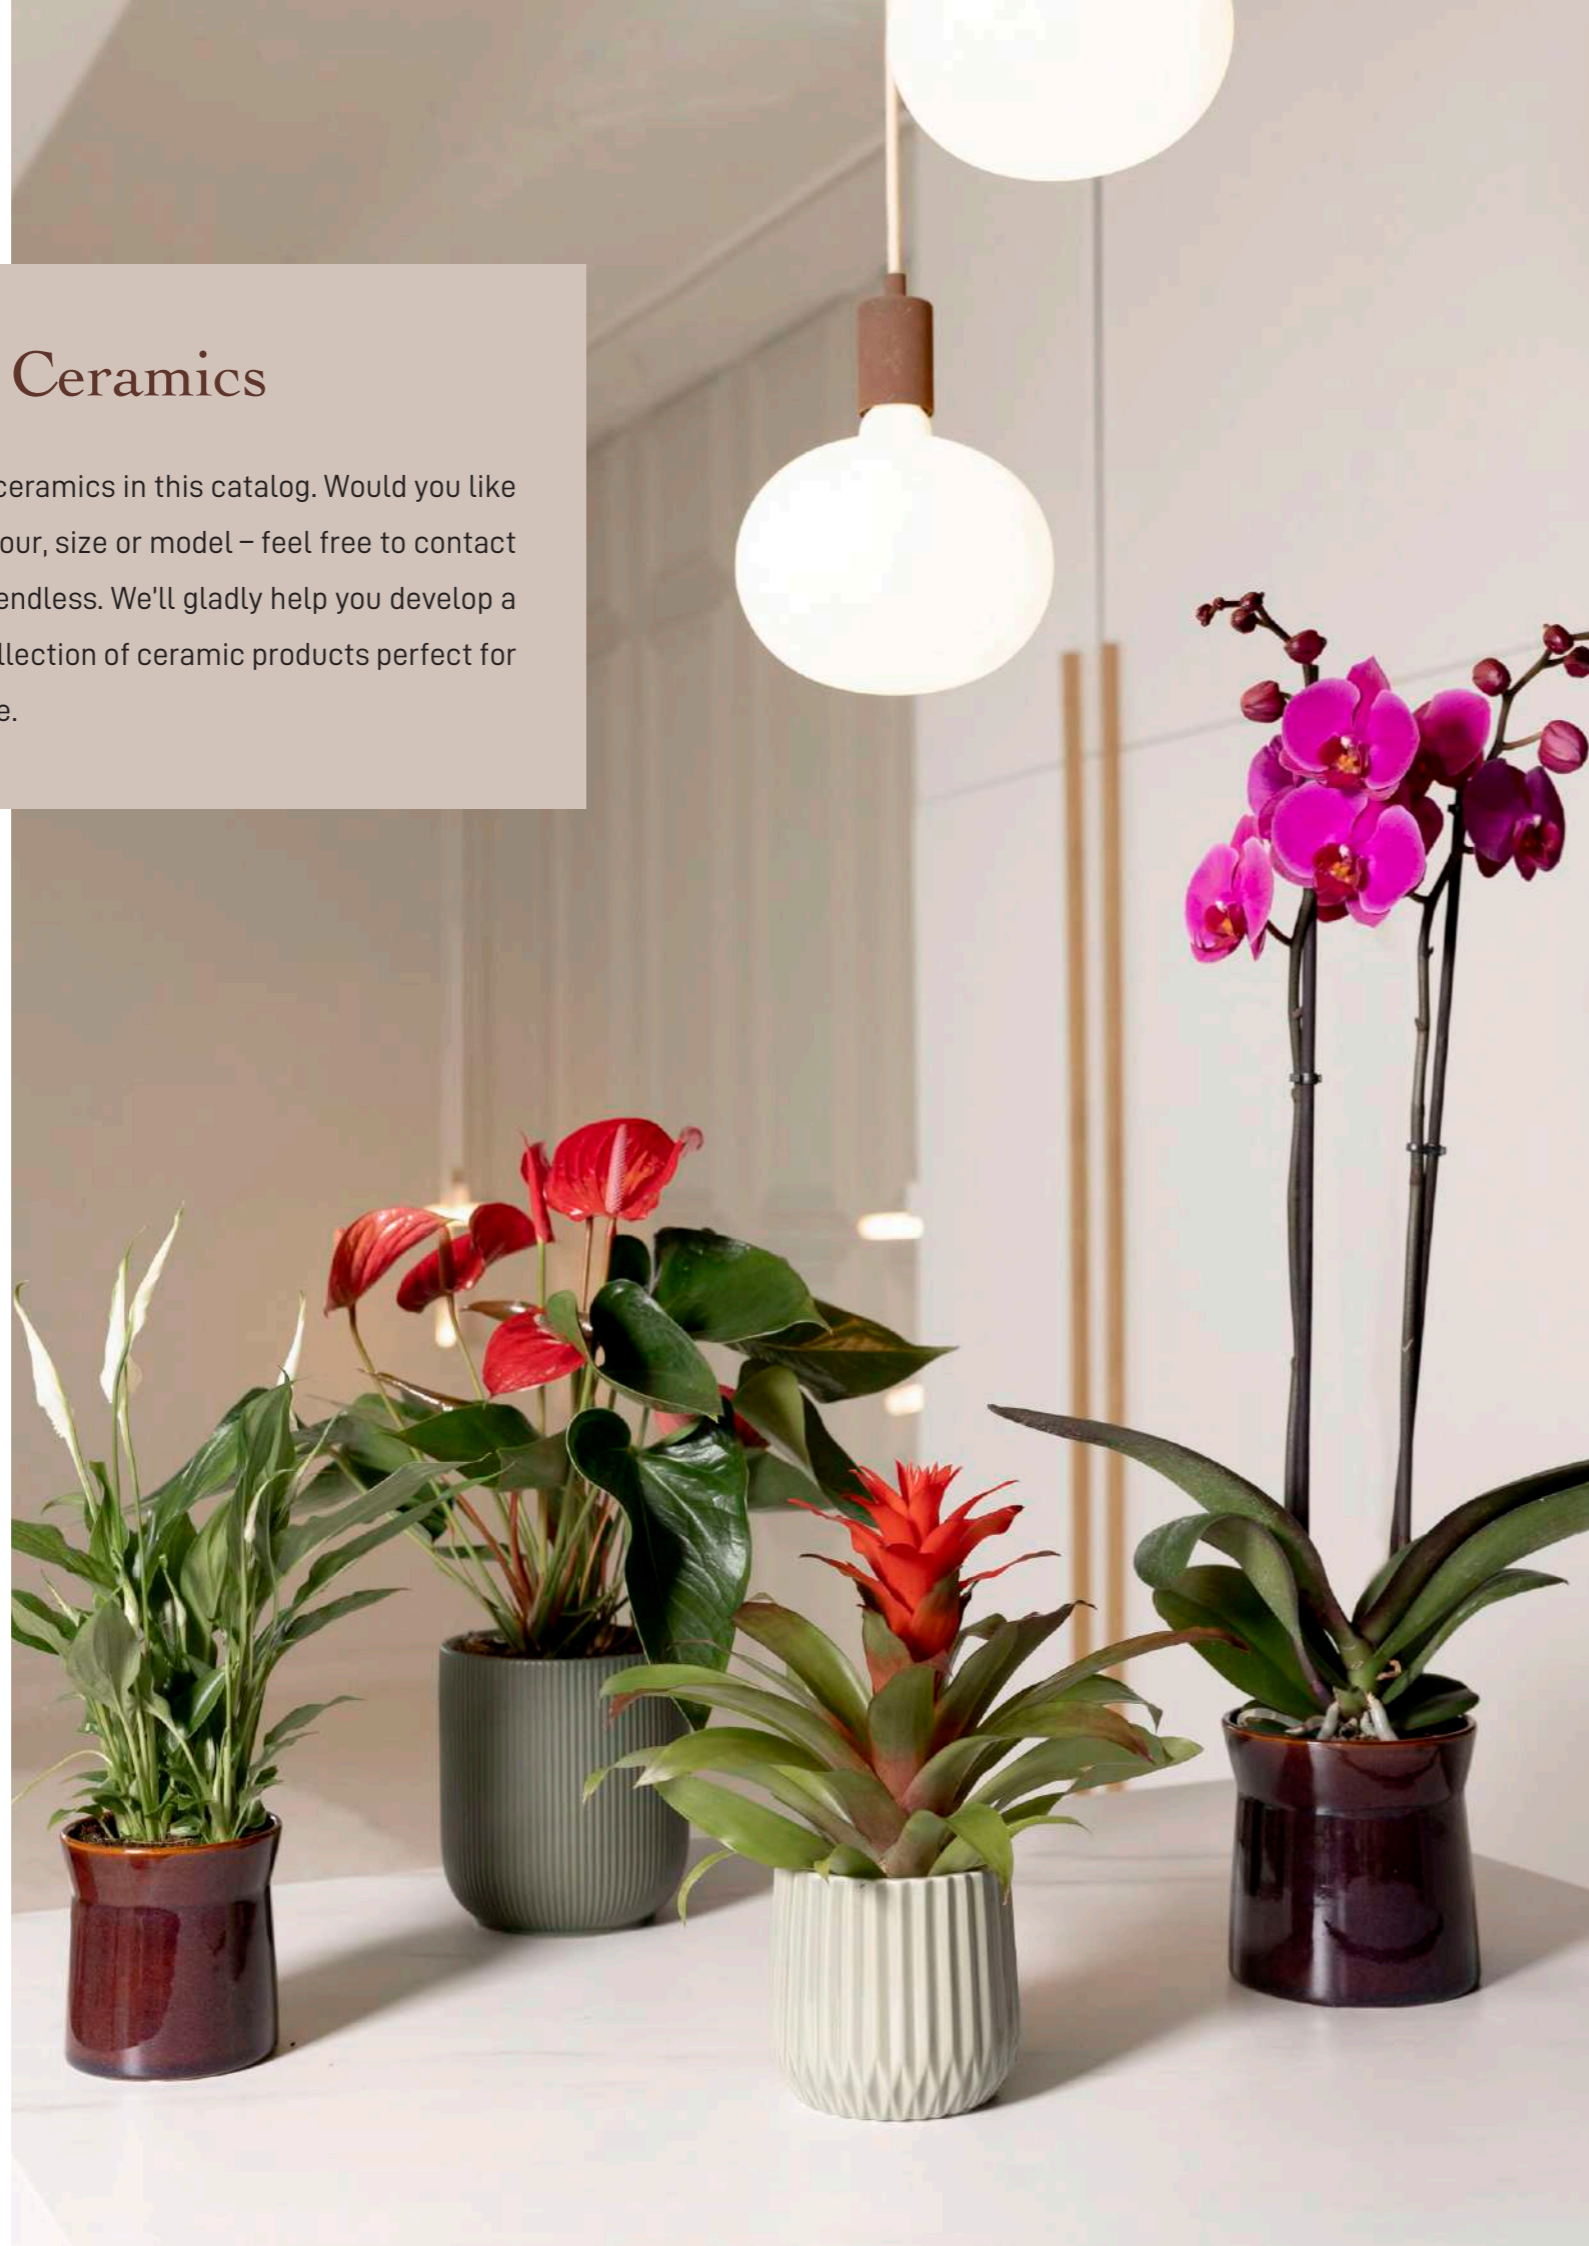

Another value-adding method to entice consumers with beautiful plants is called shopper activation. This often involves multiple parties to make sure that the most effective activation is achieved for your shopping audience. As example. We collaborate with the 'Adopt Rainforest' initiative. With every sold plant, we adopt a piece of rainforest to protect nature. It provides unique storytelling, a sustainable image for the store and a good feeling for the consumer.

**We are happy to think along with you!**

## Meet our Ceramics

Get inspired by our ceramics in this catalog. Would you like a different print, colour, size or model – feel free to contact us. The options are endless. We'll gladly help you develop a fully customized collection of ceramic products perfect for your target audience.

# Get inspired!

Value creation. That is our common goal. That is why we like to respond to specific target audiences, seasons and holidays. We have captured this in a number of collections. Ceramics, plants and colours are carefully selected for each collection to create an inspiring and attractive display. Whether it's for a garden center table or a retail presentation, we are happy to think along with you.

Curious about our collections? Get inspired by this catalog.

## Lifestyle Collections →

### Sparkle and shine

Just because in winter you stay much more indoors, the atmosphere in the house becomes even more important. Fortunately, plants are real mood makers. With a flowering plant at home, you can easily defy these gray days. Add a little luxury and sparkling ceramics into your home and you are ready for Christmas!
