About Riza

Riza is a collective of leading family businesses, where the passion for growth and bloom is rooted in generations. From January 1, 2025, we will consolidate our range of flowering plants for the market. The result? A flowering assortment of Bromeliads, Orchids, Anthuriums, Spathiphyllum and Azaleas.

Our growers use their craftsmanship every day to produce high-quality plants. They know their products like the back of their hand and always set the bar a little higher. Each in their own way, but with a shared vision and drive. By exchanging knowledge and experiences, they bring out the best in each other. That's what we call 'growing together'.

Growing Together

Bromelia Specialist

Bromeliads

Bromelia Specialist is your trusted partner for a varied range of premium Bromeliads. As a market leader, we specialize in breeding, cultivation and innovative product development. With years of experience, we know which Bromeliads suit each country, retail format, and consumer best. Together with our partners, we deliver top-quality Bromeliads to garden centres, DIY stores, supermarkets, and wholesalers across Europe.

Karma Plants

Anthuriums, Jewel Orchids, Philodendrons

We cultivate high-quality plants under the most sustainable conditions. Our plants are distinguished by our unique and groundbreaking sustainable cultivation system, 'Grown with WaterWick,' ensuring that all our plants are completely peat-free. Driven by the passion of our dedicated team, we strive every day to support our customers, providing thoughtful insights and innovative solutions. As a reliable partner, we guarantee the renowned 'Karma quality' in every plant we offer.

Maarel Orchids

Phalaenopsis

In our nursery in Maasdijk we cultivate 25 varieties of Phalaenopsis (12 cm), each with an average of two branches and sixteen flowers. Our strength lies in this sharp focus. This allows us to produce uniform, large batches of potted orchids with consistent quality that retailers can rely on. We achieve this by working fully automated and sustainably.

Ter Laak Orchids

Phalaenopsis

Growing top-quality orchids in fully sustainable nurseries. That is our driving force. That's why we continuously invest in sustainable solutions, technological innovations and strong collaborations. Just as we do in knowledge, growth and enjoyment within our team. Together, we aim to enhance people's health and happiness with our orchids. Now and in the future.

Van der Voort / Concorde Plants

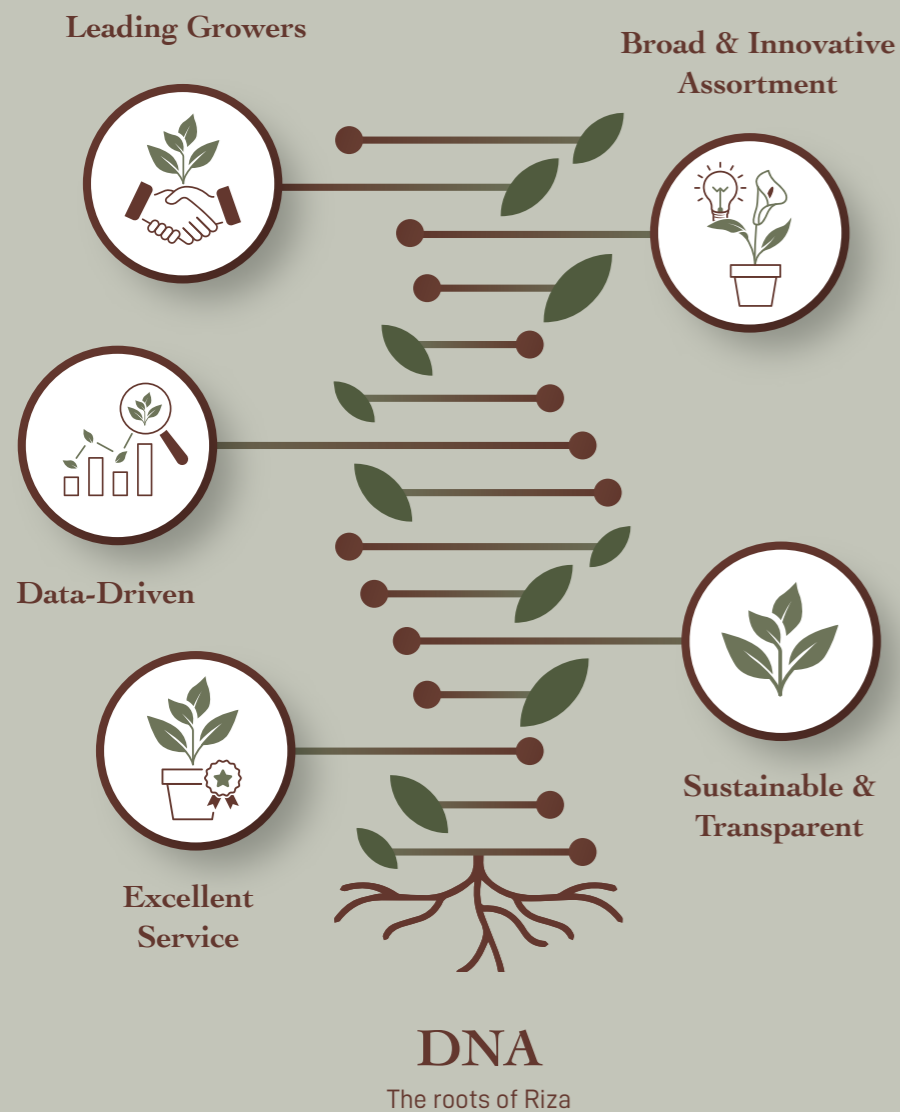

Spathiphyllum, Azalea

Welcome to the world of Spathiphyllum and Azalea. In our nurseries in Honselersdijk, we work every day to produce top-quality plants in a wide variety of pot sizes. Our colleagues, advanced automation and the use of data make this possible. Together, we have one goal: to let consumers enjoy our plants for as long as possible!

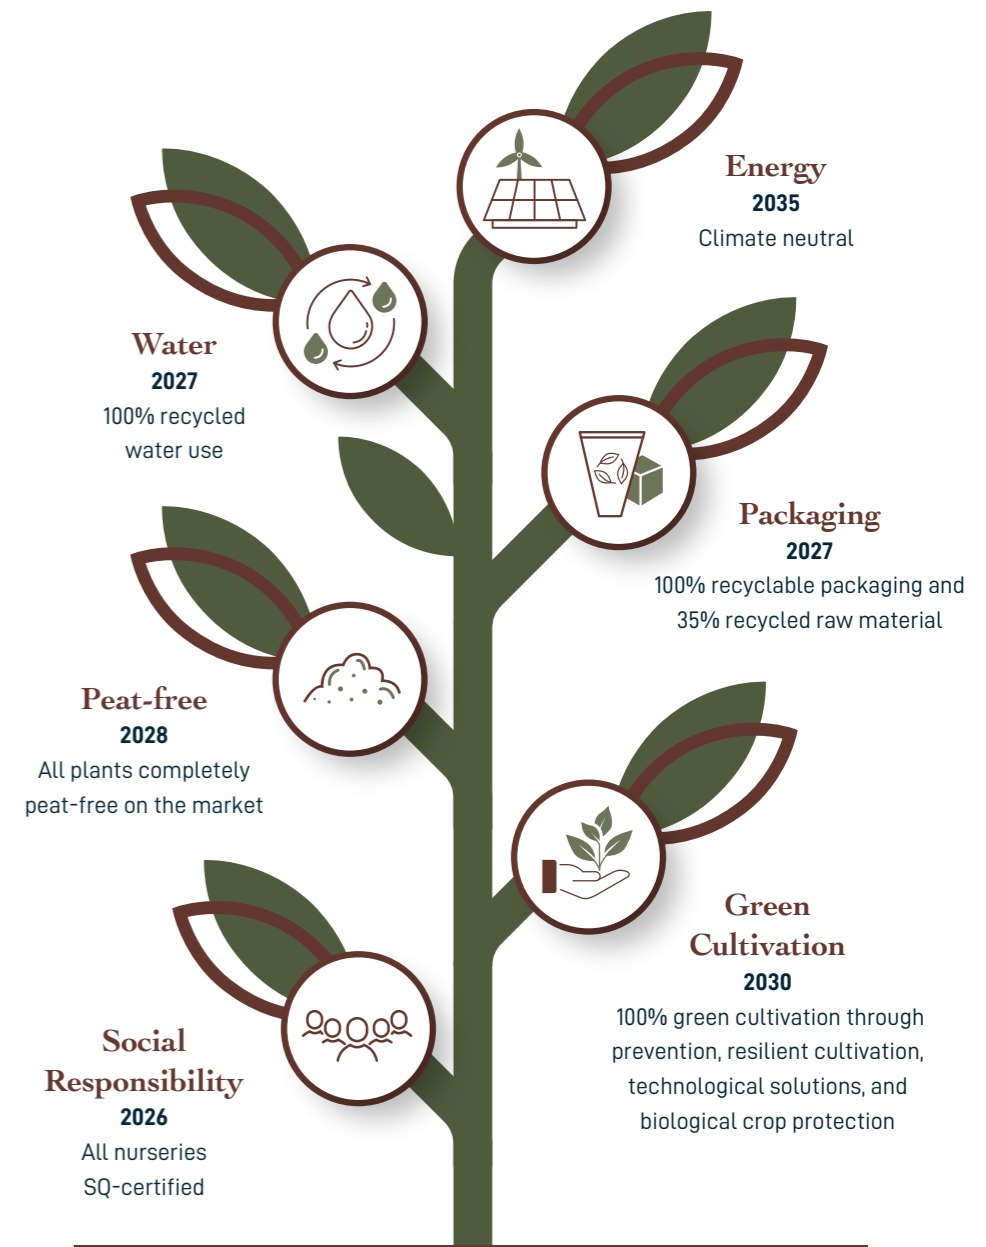

Growing Together

Making people happy and joyful with the most beautiful flowering plants. That is our goal. Our aim? The right plant, in the right place, at the right time, in the right presentation. We do this based on solid data. That's why we continually invest in knowledge and data about the market, customers, and consumers. Just as we invest in transparency regarding the sustainable cultivation methods of our growers. Together with our growers and customers, we aim not only for maximum value creation in the supply chain and on the shelf but also to bring nature closer to people.

Sustainability

Sustainable products, sustainable production and sustainable relationships. This is the driving force behind Riza and our growers. Intrinsically motivated, we continuously work on reducing our ecological footprint. What this require from all of us? Collaboration, innovation and transparency. Throughout the entire chain. So that we can pass on a healthy world to future generations.

The Riza Tree
Our Commitment to Our Planet

Grown with WaterWick

PEAT
FREE

The sustainable cultivation solution

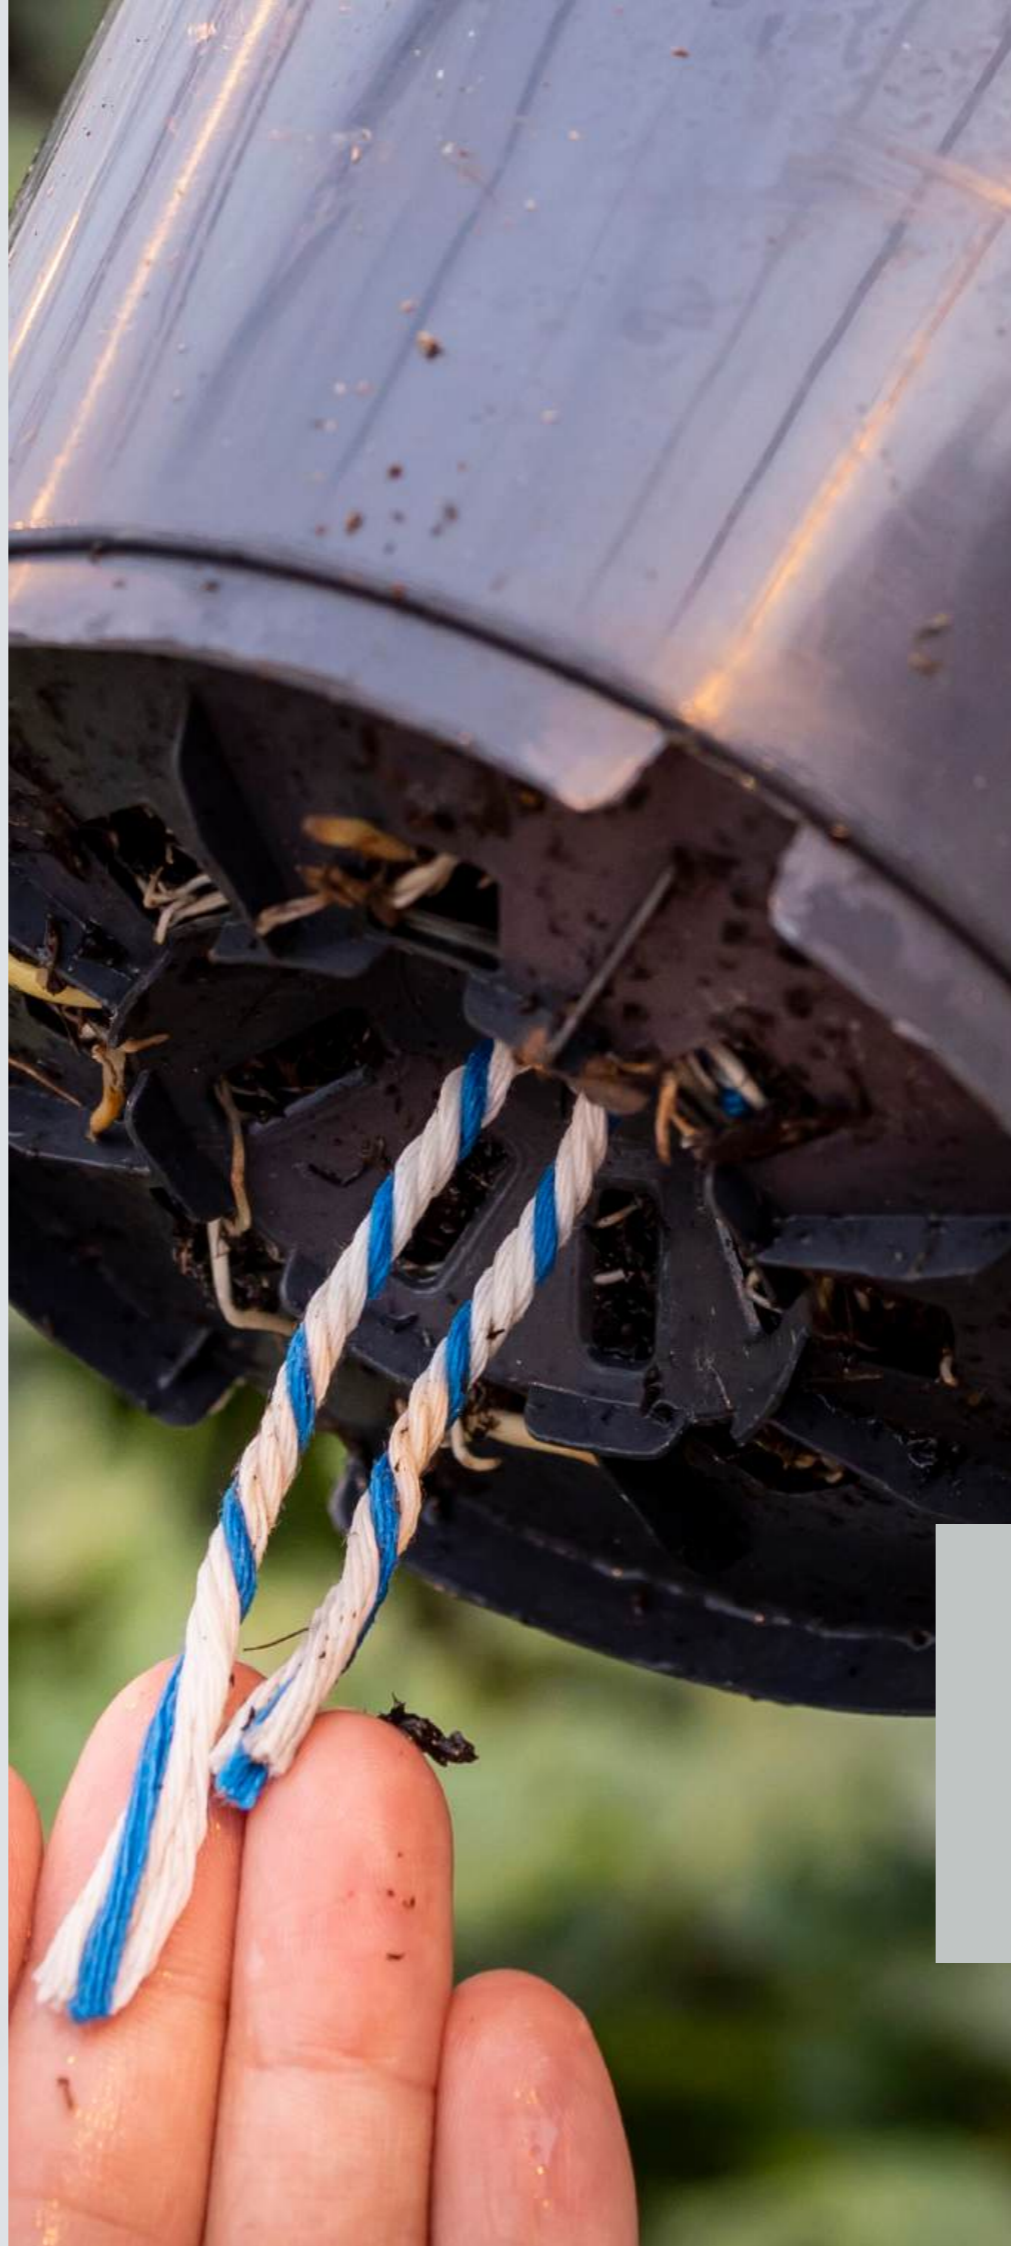

The Grown with WaterWick cultivation system is a revolutionary approach to sustainable gardening that benefits growers, retailers, and consumers alike. Since 2018, Karma Plants, our Anthurium grower, has dedicated itself to this system, which allows plants to absorb only the water they need, eliminating water waste. Each plant of our Anthurium grower is equipped with a 'Waterwick' string from the start, ensuring the delivery of essential nutrients for healthy root formation and improved plant longevity.

PEAT-FREE

Additionally, this innovative system supports peat-free cultivation. Karma Plants has conducted extensive trials over three years to find alternatives to traditional peat-based potting soil, successfully reducing peat usage while maintaining high quality. Their commitment has led to a fully peat-free product line, demonstrating that sustainability can coexist with excellent plant quality. Through Grown with Waterwick, Karma Plants is contributing to a healthier planet for future generations.

DECORATIVE POTS ADDING VALUE

How can we offer consumers more convenience in care? How can optimal benefit be obtained from the WaterWick system? These are all questions that our Anthurium grower Karma Plants has tackled. The result? A perfect fit pot with water reservoir for easy care at home.

Our Plants

Easy care

Our plants are strong and provide months of blooming pleasure. On one condition: the consumer has to give them enough love and attention. Difficult? Certainly not! You can easily find the care tips for each product via this QR code.

← Scan for care

Health & happiness

Did you know that plants improve our health? Plants provide oxygen, improve air quality and enhance our well-being. In a green environment, we are more productive and creative. Moreover, plants reduce stress and enhance our ability to concentrate. And not to forget; they make every space more inviting.

Did you know?

All our Mimesis plants leave the nursery with a QR code. Consumers can easily scan this QR code for care tips and inspiration. Do they need additional help? They can chat with our plant coach Amara. In this way they become real plant experts.

Our Brand: Mimesis

Share your emotions

Mimesis is a label that revolves around emotion, sharing and connection. The word comes from Greek and literally means 'reflection'. When you give a plant as a gift, it reflects your love, pride or support for someone else. It touches and surprises, offers comfort and brings energy. A beautiful gift. With this, Mimesis creates meaningful moments and cherished memories.

Services

Lifestyles

Every two years, we present four new lifestyles. Each lifestyle represents an atmosphere that resonates with a specific target audience or period. Do you want a stylish presentation to maximize your value creation? Please contact us. Together we carefully select the right plants, ceramics and colours for your store.

For example, discover our lifestyle Charming Balance; a stylish and calm atmosphere with soft pastel colours. A style that fits perfectly with Valentine's Day, Women's Day and Mother's Day.

Contentportal

Looking for practical or surprising content? For example photos for your magazine, a care poster for your store or videos for your social media channels. Visit our contentportal and download content for free (available in six languages).

Special requests?

Our marketing department is ready to assist you.

Wholesale inspiration

Are you a wholesaler and would you like thematic carts in your wholesale business? Completely in colours that match the season, such as this autumn cart. Or do you want to increase the recognizability of Mimesis? Contact us for a tailored proposal.

GROWN WITH waterwick

Discover our stunning botanical anthuriums, a remarkable addition to our anthurium collection! Each variety features breathtaking foliage that truly captivates. The Birdnest showcases beautifully strong, wavy leaves, while the Clarinervium and Crystallinum stand out with their exquisite, velvety patterns. Elevate your plant game with these unique beauties!

Anthurium Birdnest |

A truly unique gem in the plant world! With its robust roots, it's not just beautiful; it's the strongest of its kind. This stunning plant brings a vibrant jungle vibe to your space while showcasing gorgeous botanical flowers. Plus, it's incredibly durable, thriving even in shaded areas!

Birdnest
Height 45-55 cm | Pot size ø 17 cm

Anthurium Clarinervium |

Meet the Anthurium Clarinervium: a resilient beauty that blends durability with elegance! With its stunning, velvety leaves and impressive longevity, this plant is both visually striking and strong. Plus, it thrives in cooler temperatures down to 7 degrees, making it a versatile addition to your collection!

Clarinervium Tarantula
Height 25-35 cm | Pot size ø 12 cm

Anthurium Crystallinum |

Discover the extraordinary Anthurium Crystallinum Collection, where each plant is one of a kind, showcasing its own distinct characteristics! With stunning shimmers on the silver veins and beneath the leaves, these plants bring an irresistible wow factor to any space.

Shine your phone's flashlight on the leaves, and you'll discover countless sparkling diamonds hidden among them!

Crystallinum Fluorite

Nice to know: Did you know that this unique 'anti-snoring' pineapple plant can ensure a good night's sleep? This Pineapple plant, unlike other plants, produces oxygen during the night. Clean air in the bedroom contributes to a deeper sleep and reduces snoring symptoms. Sleep tight!

Pineapple Plant |

The pineapple plant is the best-known member of the Bromelia family and currently the most popular. The pineapple plant has high ornamental value—how could it not? It's the only Bromelia to bear a fantastic tropical fruit on its stem, exuding a wonderfully sweet fragrance as it ripens.

Mi Amigo Royal
Height 40-50 cm | Pot size ø 12 cm

Aechmea |

The Aechmea Pepita Flame, part of the Royal varieties, is an orange Bromelia with thick leaves that thrive in drier environments. Its leaves feature tiny scales, forming an efficient system for absorbing moisture from the air.

Aechmea Pepita Elegant Flames Royal
Height 43-50 cm | Pot size ø 12 cm

Multiflower |

The Multiflower has an exceptional shape. This unique Vriesea features several teardrop-shaped flowers in vibrant red and yellow-orange hues. Its narrow, compact leaves create a beautiful bouquet alongside the varied flowers.
